

# Achieving sustainable food systems in a time of multiple crises: a new global roadmap

Tuesday, 25 July 2023, 13.30 - 14.25 PM (CET) – German Room, C269

## Background and objectives

Bridging humanitarian and system change agendas, this side event recognizes the global food crisis as a major hurdle to SDG2. It serves as a call to action to urgently enhance the resilience of financial and environmental systems and accelerate food systems transformation.

At its core is the launch of Hesat2030, a visionary global roadmap dedicated to developing and implementing costed and evidence-based solutions that effectively transform food systems to deliver healthy diets for all in a sustainable way. It will synthesise lessons from the global food crisis, profile pertinent experiences embedded in country contexts and showcase joint advocacy to break the cycle of crises.

## Expected outcomes

- Recognize the urgent need for coordinated efforts and position long-term investments as crucial in addressing hunger and improving food systems.
- Launch Hesat2030, a global roadmap to end hunger sustainably, nutritiously, and equitably.
- Promote costed and evidence-based solutions in country contexts.

## Moderator

**Ms. Carin Smaller**  
Shamba Centre for Food and Climate

## Panellists

**HE. Harifidy Ramilison**  
Minister of Agriculture & Livestock, Madagascar

**Dr. Felix Phiri**  
Dept of Nutrition, HIV and AIDS, Gov of Malawi
